Please note that the analysis performed was a limited test and that it remains the responsibility of the developer to ensure that all current and future required data elements are supplied for interchange compliance. The developer must also ensure that the full and unaltered contents of the magnetic stripe are transmitted in each authorization request message.

Recertification is required by January 27, 2024 to retain TSYS Acquiring Solutions certification compliancy status. Your certification is based on the current spec and is good for three years from the date listed on your certification letter. It remains your responsibility to keep up to date with compliance and card brand changes. When you are ready to re-certify your application, add any additional functionality, or certify a new application please log into the portal and request a new case by clicking on the Cases tab and then Create New Case. Please Note: if you request an add-on to this product you may be required to do a re-certification.

If you have chosen to be published in our solutions catalog, please note we will only keep it published for three years, until the recertification date listed on this certification letter.

If you have additional questions or need further assistance, please contact Developer Services at [acq-developer\\_services@tsys.com](mailto:acq-developer_services@tsys.com).

Sincerely,  
Danny Jackson
